New Cumberland PA		10%		10%		10%
		100%		100%		100%

Total Evaluated Price

1. Offerors must submit their proposed unit prices in the boxes provided. Offerors failing to bid on all items, all years and all ranges may be disqualified.
2. The Evaluated Price will be calculated by summing the multiplication of the proposed unit price by its respective weight and maximum quantity of each range for a given ordering period and adding the totals for all periods. If first article costs are applicable they will be added to obtain the total evaluated price.
3. The FAT costs will be assessed as part of the total evaluated price, if applicable. If a FAT is required its costs will be amortized into the unit price for the initial delivery order only.
4. For evaluation purposes, the Government has weighted the ranges based on the likelihood that if an order is placed, it will be placed in that range.
